adminuser

Pending

Migration Summary

ITEM	VALUE	DETAIL
Job ID	6a3e0e65ef559a8970	Primary audit reference
Provider	Azure	Region centralindia
Status	Failed	3/6 tasks completed
Source Server	test-vm	Unknown source type
Target Server	/subscriptions/	Standard_B2ms
Cutover	Dns	Deep inspection via ssh
Created	Jun 26, 2026, 05:30	Completed Pending

Access And Host Details

ITEM	VALUE	DETAIL
Detected Source Image	Not captured	Cloud image metadata
SSH Username Hint	adminuser	Use this instead of a generic provider default when SSHing
Target Host	Pending	Preferred target host for operator access
Key Pair	No EC2 key pair	Key pair reuse not confirmed
Bootstrap	No source user-	Post-boot automation context

ITEM	VALUE	DETAIL
Generated SSH	Pending target host	Replace the key placeholder with the actual PEM or private key file

Work Checklist

ITEM	VALUE	DETAIL
Server spun up	Done	Target instance or VM exists and has a launched server identifier.
Source image copied	Pending	No source image or snapshot artifact is recorded yet.
Dependencies verified	Done	Validation logs include service or runtime evidence from inside the target.
Nginx configuration checked	Done	Validation logs include a successful Nginx configuration check.
Source preservation state	Done	Source server is configured to remain preserved for rollback.

Validation Summary

ITEM	VALUE	DETAIL
Classification	Not confirmed	No classification signals recorded
Launch Artifact	Pending	Artifact name unavailable
Public IP	Pending	DNS pending
Private IP	Pending	Internal access path

Task Timeline

ITEM	VALUE	DETAIL
Preflight checks	Pending	Validate credentials, source server, target size, permissions, and cutover options. Duration: Pending
Create source image	Pending	Create an image or snapshot from the selected source server. Duration: Pending
Launch target server	Pending	Launch a new target server with the selected size and copied cloud configuration. Duration: Pending
Validate target server	Succeeded	Verify cloud-level health, networking, and target server identifiers. Duration: 1s

ITEM	VALUE	DETAIL
Await cutover approval	Succeeded	Pause for user approval before Elastic IP, DNS, or manual cutover. Duration: 0s
Preserve source server	Succeeded	Keep the original source server available for rollback. The MVP never deletes it. Duration: 0s

Detailed Logs

ITEM	VALUE	DETAIL
Preflight checks	INFO	11:00:16 AM Starting Preflight checks.
Preflight checks	ERROR	11:00:16 AM Failed to fetch Azure authentication token: client secret expired.
Preflight checks	INFO	11:00:20 AM Job resumed by user. Resetting task status to pending.
Create source image	No logs	No execution logs were recorded for this task.
Launch target server	No logs	No execution logs were recorded for this task.
Validate target server	INFO	11:00:14 AM Validating Azure target VM network and health.
Validate target server	INFO	11:00:14 AM Describing target VM instanceView status...
Validate target server	INFO	11:00:14 AM Target VM power state is 'running'. Verification succeeded.
Validate target server	INFO	11:00:14 AM Target Private IP: None.
Validate target server	INFO	11:00:14 AM Target Public IP: 52.172.1.2.
Validate target server	INFO	11:00:14 AM Initiating remote deep inspection validation checks via Azure Run Command...
Validate target server	INFO	11:00:14 AM Calling Azure Compute RunCommand: RunShellScript (command: 'systemctl list-units --type=service --state=running')
Validate target server	INFO	11:00:14 AM RunCommand exit code: 0. Output: UNIT LOAD ACTIVE SUB DESCRIPTION cron.service loaded active running Regular background program processing daemon dbus.service loaded active runnin...
Validate target server	INFO	11:00:14 AM Calling Azure Compute RunCommand: RunShellScript (command: 'docker ps --format "{{.Names}}" ({{.Status}})')

ITEM	VALUE	DETAIL
Validate target server	INFO	11:00:14 AM RunCommand exit code: 0. Output: rabbitwatch-agent-container (Up 3 hours) postgres-db (Up 3 hours) redis-cache (Up 3 hours)
Validate target server	INFO	11:00:15 AM Calling Azure Compute RunCommand: RunShellScript (command: 'nginx -t')
Validate target server	INFO	11:00:15 AM RunCommand exit code: 0. Output: nginx: the configuration file /etc/nginx/nginx.conf syntax is ok nginx: configuration file /etc/nginx/nginx.conf test is successful
Validate target server	INFO	11:00:15 AM All remote Azure Run Command deep inspection checks passed with status: clean.
Await cutover approval	INFO	11:00:15 AM Executing Azure VM cutover traffic rerouting.
Await cutover approval	INFO	11:00:15 AM Fetching target VM details to obtain Public IP...
Await cutover approval	INFO	11:00:15 AM DNS Cutover active: Updating Azure DNS Zone rabbitwatch.dev record 'app' (A) to point to IP 52.172.1.2...
Await cutover approval	INFO	11:00:15 AM Successfully updated Azure DNS record 'app.rabbitwatch.dev' to target IP 52.172.1.2.
Preserve source server	INFO	11:00:15 AM Updating source VM state.
Preserve source server	INFO	11:00:15 AM Keeping source VM running as requested by configuration.
